Company Update | Zetrix AI (ZETRIX MK/BUY/RM0.805/Target: RM1.62)

Page 2

Zetrix is well-positioned to deliver record-high earnings in 4Q25-1Q26, lifted by RM500m Zetrix token sales to Bullish Aim. We anticipate organic earnings growth from Zetrix's new ancillary revenue streams from the blockchain segment, alongside stable e-government services' volume which will provide stable recurring revenue and healthy cash flow. With more applications on the Zetrix blockchain, we assess further elevation of Zetrix's profitability in 2026. Maintain BUY with a higher target price of RM1.62.

Zetrix AI (ZETRIX MK)

Blockchain Accelerations Well Undervalued

Highlights

- 4Q25-1Q26 results will reflect the RM500m Zetrix AI (Zetrix) token sales to Bullish Aim, lifting earnings meaningfully.
- Ramp-up of various blockchain-related services and potential spin-off of the web3 business remain key catalysts for the group. Maintain BUY with a higher target price of RM1.62.

Analysis

- Sizeable Zetrix token sales to be recorded in 4Q25-1Q26.** In Dec 25, it was announced that Johor Regent Tunku Ismail Sultan Ibrahim's wholly-owned company, Bullish Aim, is establishing a digital asset treasury company (Datco) with an initial allocation of RM500m in Zetrix tokens, which may later be raised to RM1b. This is to manage the operational cost and gas fees following the launch of RMJDT, a ringgit-backed stablecoin issued on Zetrix's layer-1 blockchain. We anticipate that Zetrix will record the revenue from these Zetrix token sales in 4Q25-1Q26, lifting earnings and cashflow meaningfully.
- Zetrix's pioneer blockchain venture continues to strengthen its presence in the domestic e-government space.** Zetrix has invested over RM1b to develop its Zetrix blockchain and has launched multiple applications since its inception three years ago. This includes: a) Ztrade blockchain platform, b) certificate of origin (COO) authentication services, c) smart contract verifiable credentials (VC), d) My Digital ID, and e) Nur AI and others. More importantly, some of these G2G blockchain applications under the Zetrix platform solidify the group's presence within the domestic e-government space, with increasing adoption rates across various ministries.
- Potential spin-off of web3 business as SPV for listing may unlock value for shareholders.** We understand that Zetrix intends to create a special purpose vehicle (SPV) which contains all Zetrix cross border businesses on layer-1 blockchain such as Ztrade, Robotics, Nur AI and others to be listed in Nasdaq via a Special Purpose Acquisition Company (SPAC). Following this exercise, the group may pare down its debt and unlock value for existing shareholders, besides allowing better cashflow as capex will be largely reduced from the current RM500-600m/year run-rate.

Company Description

Zetrix AI provides e-government services between the Malaysian government and its citizens and businesses. Services include road transport segment, immigration segment, and blockchain segment.

- **My Digital ID entering use-case stages, awaiting official launch.** Locally, Zetrix has been developing the MY Digital ID Superapp with MIMOS. MY Digital ID Superapp integrates databases from multiple government agencies and provides Single Sign On (SSO) login for identity and credentials verifications. Some of these government-related applications include NIIS SuperAPP, MySejahtera, MyJPJ, MyHRMIS. We anticipate that NIIS SuperAPP and social media age verifications will boost My Digital ID signups meaningfully in 2026. Overall, Zetrix will monetise these projects through one-off registration fees and recurring income via subscription modules for any commercial entity using MY digital ID as single-login user ID solutions.
- **Ztrade adoption progressing well.** Zetrix's cross-border trade facilitation services (ZTrade) have been integrated into Malaysia's National Single Window and supports two-way cross-border verification and exchange of digitised trade documents between Malaysia and China. In Nov 25, Zetrix and the Federation of Malaysian Freight Forwarders (FMFF) also reaffirmed their commitment to jointly drive the full adoption of Ztrade – beginning with the implementation of digital Certificates of Origin (COOs) which is charging around Rmb200/document. We understand that ZTrade processes around 15,000 transactions per month from various freight forwarders.
- **Putting numbers into the picture.** With the recent commercial launching of Ztrade's two-way cross-border services with China customs, we anticipate more Zetrix token sales moving forward alongside higher transaction fees and gas fees. We had previously assessed that Zetrix's blockchain services can produce an annual revenue of over RM650m via charging gas fees, service fees per credential/contract and annual fees upon optimal utilisation of Ztrade services. For 2026, we are forecasting 9m-10m Zetrix token sales at an average price of US\$12, including the Zetrix token sales to Bullish Aim.
- **Depressed valuation highly appeals.** Zetrix's shares now trade at 5.3x 2026F PE, well below GE14's historical trough of around 12x. Such valuations are highly attractive and shall regain investors' focus especially after factoring in the dissipating concerns of its e-government concessions' relevance and impressive earnings track record (consecutive quarters of record-high core earnings, alongside tremendous earnings potential from the Zetrix blockchain if executions are on point). The dividend yield of 3.5-4% for 2025-27 (assuming usual 22-30% dividend payout) is also commendable.

Valuation/Recommendation

- **We raise our 2025-27 earnings forecasts by 11-26%**, factoring in the RM500m proceeds from Zetrix token sales to Bullish Aim and higher services-related earnings for Ztrade and My Digital ID.
- **Maintain BUY with a higher target price of RM1.62 (from RM1.52)**, pegged to 11.4x 2026F PE (-1SD below mean). We lowered our PE peg from 14x (-0.5SD below mean) to 11.4x (-1SD below mean) to reflect overall weaker investor sentiment. If we were to peg our target price to 14x (-0.5SD below mean), the implied blue-sky target price would be around RM1.99.
- Overall, we retain our view that Zetrix is undervalued, and will be re-rated following better cashflow conversion, lower gearing following spin-off of its web3 business as SPV and growing dividend yields following record-earnings.

Environmental, Social, Governance (ESG) Updates

Environmental

- MYEG's carbon footprint is limited to energy consumed in an office environment and does not impact biodiversity or climate change in any significant way.

Social

- Subscribed to the United Nations International Bill of Human Rights.
- Spent RM2.5m in community investment to support over 50 charity groups in 2021.

Governance

- Comprehended and applied Malaysian Code on Corporate Governance (MCCG).

Oxford Innotech

(OXB MK/BUY/RM0.280/Target: RM0.40)

New Year, New Growth; Unlocking A New Earnings Lever In The DC Space

Highlights

- **Secures DC precision components contract.** Oxford Innotech (OXB) announced on Bursa Malaysia that its wholly-owned subsidiary CG Solutions Enterprise Sdn Bhd has accepted a Letter of Award from the Singapore office of an Australia-based data centre and computer room infrastructure specialist. The contract entails the supply of precision steel components for data centre (DC) airflow management solutions, with a contract value of RM4.8m, for a DC project commissioned by a US-based global technology group. The project is scheduled to commence next month and is expected to be completed by end-26.
- **New segment venture to spearhead growth on palatable margins.** The supply of precision steel components for data centre airflow management solutions marks OXB's maiden inroad into the DC segment, which we view as strategically positive given the potentially higher margin profile associated with sophisticated design and precision manufacturing work. While the contract contributes only around 6% of our 2026 revenue assumptions, we see this as an important door-opening opportunity that could pave the way for stronger order wins over time, underpinned by the typically resilient and recurring nature of DC-related jobs. At a broader level, the ongoing DC build-out and retrofitting phase in Malaysia should also support a pipeline of higher-value infrastructure-related opportunities for integrated engineering solution providers with DC related jobs experience, provided execution and delivery remain satisfactory.
- **Aggressive expansion to capture next tsunami of growth.** OXB has raised gross proceeds of RM41.6m, of which 55.5% and 26.9% have been earmarked for the construction of a new factory (+2.25x space) and the purchase of new machines (+16% capacity) respectively. Upon full completion (Phase 1 to begin operations in 2H25; Phase 2's completion by 3Q27), the total manufacturing areas will increase to 193,000sf (+2.25x from 86,000sf), allowing for the installation of 25 additional machines (+16% from 158 currently) to significantly boost production capacity. This expansion comes at a time when OXB has maintained an optimal machine utilisation rate of 75% (two shifts) in 2024, underpinned by a jump in demand from its key customer, SIBS AB Group (SIBS).
- **Fuelled by structural expansion.** OXB's record-breaking 2024 performance (revenue/core net profit: +88%/+94%) was driven by a surge in its MBS segment, which contributed 46% of total revenue. This boom was largely driven by SIBS, a Sweden-based disruptor in modular construction, operating exclusively from its cutting-edge Penang plants. In 2024, OXB clinched a 10-year supply deal with SIBS to deliver precision sheet metal components and metal frames. While a brief order lull is expected in 2025 after the Saudi Arabia project handover, SIBS' hefty US\$1.27b orderbook, with fresh traction in new overseas jobs alongside mass production conversion from its semiconductor customers, could cement its growth into 2026. Beyond SIBS, we understand that the group has been receiving additional backlog orders from its semiconductor customers, following the conversion of first-article jobs into mass production, which could drive the bulk of its earnings in 2026.

Earnings Revision/Risk

- While we make no changes to our earnings forecast, incremental job wins from DC-related projects and a ballooning order book could prompt upward earnings revisions to our 2026 forecasts.
- **Maintain BUY with an unchanged target price of RM0.40** still based on a conservative 20.0x 2026F PE which is at a 40% discount to the seven-year average forward PE of semiconductor production equipment players. We anticipate a sharp rebound in 2026, driven by the sector's cyclical recovery, deeper alignment with customers' growth roadmaps, and an expanded job scope.

Market Spotlight

Market News

The FBMKLCI rebounded by 6.75pt (+0.40%) to close at 1,705.81 yesterday. Meanwhile, most Asian stocks fell on Wednesday, extending recent declines as heightened geopolitical uncertainty over the US demands for Greenland unsettled investors. The FBMKLCI's top gainers were Mr D.I.Y. Group (M) (+2.3%), Press Metal Aluminium Holdings (+2.2%) and Petronas Gas (+2.1%), while the top losers were Gamuda (-1.3%), 99 Speed Mart Retail Holdings (-1.3%) and Kuala Lumpur Kepong (-0.99%). In the broader market, gainers outpaced losers 591 to 443 with 567 counters unchanged. Turnover was 2.84b shares valued at RM3.13b.

US stocks were higher after the close on Wednesday, as gains in the Oil & Gas, Industrials and Healthcare sectors led shares higher. At the close in NYSE, the Dow Jones Industrial Average added 1.21%, while the S&P 500 index climbed 1.16%, and the NASDAQ Composite index gained 1.18%. Rising stocks outnumbered declining ones on the New York Stock Exchange by 2094 to 653 and 78 ended unchanged; on the Nasdaq Stock Exchange, 2288 rose and 1097 declined, while 174 ended unchanged. (Sources: *Investing.com*)

FBMKLCI, FCPO & FKLI Index Outlook

FBMKLCI

Source: UOBKH ChartGenie

FTSE Bursa Malaysia KLCI

Last close: 1,705.81

Expected moving range: 1,700 – 1,730

Technical view:

The FBMKLCI is trading within a tight range but managed to make a technical rebound yesterday. We expect the index to trade sideways as the RSI indicator suggests flattish momentum. The index is likely to continue moving within the 1,700-1,715 range. If the index fails to stay above this level, the next support levels are at 1,685 and 1,658. Support and resistance levels are still maintained as follows:

Support: 1,686, 1,658

Resistance: 1,715, 1,730

FCPO

Source: Tradingview

Futures Crude Palm Oil (FCPO) Active Contract, 1 Hour Chart

Technical BUY with +2.4% upside

Trading buy range: RM4,070-4,100

Last price: RM4,200

Target price: RM4,273, RM4,299

Support: RM4,027

Stop-loss: RM4,026

BUY with a target price of RM4,194 and stop-loss at RM4,026. Based on the chart, FCPO continued the bullish movement and closed higher at RM4,085 on yesterday's movement. This positive signal is supported by an uptick in the RSI and a bullish crossover in the DMI indicator. We maintained our targets at RM4,273 and RM4,299 in the near term.

Expected timeframe: One day to three days

FKLI

Source: Tradingview

FTSE Bursa Malaysia KLCI Futures (FKLI), 1 Hour Chart

Technical BUY with +1.3% potential return

Trading buy range: 1,700-1,715

Last price: 1,712

Target price: 1,726, 1,734

Support: 1,691

Stop-loss: 1,689

BUY with a target price of 1,734 and stop-loss at 1,689. Based on the chart, FKLI formed a series of higher highs and higher lows that indicates an uptrend pattern. This bullish movement is supported by an uptick in the RSI and bullish crossovers in the MACD. We peg our targets at 1,726 and 1,734 in the near term.

Expected timeframe: One day to three days

Traders' Corner

Source: UOBKH ChartGenie

Duopharma Biotech (DBB MK)

Technical BUY on breakout with +11.2% potential return

Trading buy range: RM1.34-1.36

Last price: RM1.31

Target price: RM1.44, RM1.49

Support: RM1.23

Stop-loss: RM1.22

BUY on breakout with a target price of RM1.49 and stop-loss at RM1.22. The stock has gradually recovered and established a bullish bias again after closing above the BBI line yesterday. The bullish crossover in the MACD points to growing momentum which could fuel further upside in the near term. Additionally, an uptick in the +DI line was supported by the ADX, indicating a stronger uptrend ahead. We peg our targets at RM0.975 and RM1.02 in the near term.

Expected timeframe: Two weeks to two months

Note: Not available for CFD Trading

Source: UOBKH ChartGenie

QES Group (QES MK)

Technical BUY on breakout with +23.9% potential return

Trading buy range: RM0.44-0.45

Last price: RM0.43

Target price: RM0.515, RM0.545

Support: RM0.375

Stop-loss: RM0.37

BUY on breakout with a target price of RM0.545 and stop-loss at RM0.37. Share price has made a healthy correction from the recent high and tested the immediate support of RM0.375 in the last few weeks. However, QES rebounded off the support level to close above the BBI line yesterday, which in our view, places the uptrend back on course. A surging momentum as shown by an uptick in the RSI would likely prolong the upward movement, while the DMI currently is on a bullish crossover.

Expected timeframe: Two weeks to two months

Teo Seng Capital (TSCB MK)

Technical BUY on breakout with +17.0% potential return

Trading buy range: RM1.06-1.08

Last price: RM1.06

Target price: RM1.16, RM1.24

Support: RM0.975

Stop-loss: RM0.97

BUY on breakout with a target price of RM1.24 and stop-loss at RM0.97. The stock has gradually recovered and established a bullish bias again after closing above the BBI line yesterday. The bullish crossover in the MACD points to growing momentum which could fuel further upside in the near term. Additionally, an uptick in the +DI line was supported by the ADX, indicating a stronger uptrend ahead. We peg our targets at RM1.16 and RM1.24 once it penetrates above the breakout level of RM1.06.

Expected timeframe: Two weeks to two months

Note: Not available for CFD Trading
