Ancom Nylex

Expecting sequential recovery ahead

ANCOMNY posted a 2QFY26 core net profit of RM17.9m (-10.6% QoQ, +63.9% YoY), accounting for 44% of our full-year forecast and 43% of consensus. We deem the results within expectations, as the softer 1H performance was seasonally driven, with earnings expected to recover sequentially in 2HFY26. Positively, MSMA has received approval for use in Brazil's soybean crop, significantly expanding its addressable market. We maintain our forecasts and **BUY** rating with an unchanged TP of RM1.13, based on 15x PE on core EPS of 7.5 sen.

Earnings deemed within expectations. ANCOMNY reported 2QFY26 core net profit of RM17.9m (-10.6% QoQ, +63.9% YoY), bringing 1HFY26 sum to RM37.8m (+53.4% YoY). 1HFY26 core net profit was arrived after adjusting mainly for forex loss and net reversal on impairment loss on receivables. The results accounted for 44% of our full-year forecast and 43% of consensus' estimate. Nevertheless, we view the performance within expectations, as the shortfall was largely attributable to seasonality, with 1H typically being weaker, and we expect sequential earnings recovery in 2HFY26.

Dividend. None.

QoQ. Core net profit declined -10.6% QoQ to RM17.9m, primarily due to weaker contributions from its key segments, including Agricultural Chemicals (-2.3%) and Industrial Chemicals (-4.4%). The softer performance in the Agricultural Chemicals segment was mainly driven by weaker ASPs, while the Industrial Chemicals segment was impacted by lower ASP amid a softer oil price environment. Consequently, core net profit margin narrowed to 4.2% in 2QFY26, from 4.5% in 1QFY26.

YoY/YTD. Core net profit rose +63.9% YoY/+53.4% YTD despite a -4.9% YoY/-9.3% YTD declined in revenue, underpinned by margin expansion in the Industrial Chemicals segment on improved operational efficiency within the distribution business, lower finance costs, and a turnaround in associates to a profit of RM0.4m in 2QFY26 from a marginal loss in 2QFY25.

Outlook. While the industrial chemicals segment is expected to remain subdued amid lower ASPs and margin pressure in a weaker oil price environment, we believe the Group's outlook will be underpinned by the Agricultural Chemicals segment. We are encouraged by ANCOMNY's recent milestone, with monosodium methanearsonate (MSMA) receiving approval for use in Brazil's soybean crop. Brazil's soybean planted area of c.45m hectares is approximately 5x larger than its sugarcane area of c.9m hectares, significantly expanding the addressable market for MSMA. Distribution of MSMA into the soybean segment will be undertaken via ANCOMNY's established distributor network in Brazil. In FY25, ANCOMNY sold c.2m litres of MSMA into Brazil, primarily for sugarcane applications, and the Group is targeting a gradual volume growth of c.20-30% over FY26f-27f. We believe this development represents a meaningful scalable opportunity for ANCOMNY's active ingredient portfolio going forward.

Forecast. Unchanged.

Maintain BUY; TP of RM1.13. We maintain our **BUY** rating with unchanged TP of RM1.13, pegged to PE multiple of 15x, slight discount to its global peers' average PE of 17.5x. We like ANCOMNY for its: (i) niche as the sole large scale producer of active ingredients (AIs) for herbicides in ASEAN as AI manufacturing commands high barriers to entry and (ii) earnings growth potential driven by its pipeline of new AIs to be rolled out.
